

# Daily stories

2023 quick ship program Japan

connubia

Every home has stories of everyday life and extraordinary events,  
that follows from one to another and that nourish  
our memory and our emotions.

We live at our home environment with family, with friends.  
It is a place where we share our belongings with each other.  
Space where we are surrounded with people  
that share with us our joy and serenity.

For this reason, Connubia has chosen to enter your homes,  
where you can breathe your everyday life and embrace your daily habits.

We have looked into the way you live; we have followed  
your daily rhythm and we have created furniture that could add value  
to the time you spend at home.

This is our collection: bright, spontaneous, and colourful.  
It is up to you to discover it and bring it to life with your stories.

Daily stories

# About us

## Connubia: a story of passions and ties

Connubia is a brand of Calligaris Group, the Italian reality that has been able to evolve in its 100 years of history thanks to the ability to skillfully amalgamate craftsmanship and innovation.

What motivates us is to make products that meet the taste of people and unite them. Products that create value with a special attention to the well-being of our planet.

We do this by combining the knowledge and skills of our artisans, handed down over the years to promising young talents, with new technologies, new materials and innovative development techniques.

All the materials we use comply with strict standards where quality and sustainability are essential elements in every step of the design and production process.

This is why Connubia products are beautiful, functional and made to last.

# “REEF”

design Michele Menescardi

«The 100% green armchair by Connubia where every element has been designed with an eco-sustainable and circular approach.»

The “Reef” armchair, with its bright colors and its light spirit, marks a new design awareness that has seen the company and designers collaborate side by side to find innovative solutions capable of creating a sustainable and responsible production.

This is why its lines draw a timeless but extremely contemporary product where each element has been studied with an eco-sustainable and circular approach and are the perfect expression of Calligaris Group’s “Greenbow” philosophy.

The internal frame is made of woods coming from FSC® (FSC-C002023) certified forests, while the padding comes from recycled polyurethanes from disused mattresses and from the recycling of post-consumer polyester containers.

But innovation also lies above all in the fabric with which the “Reef” is upholstered. Created entirely with post-consumer recycled plastic, from the plastic debris floating in our seas and from plastic bottles destined for landfill, this particular upholstery has been made together with SEAQUAL, the community that fights marine pollution by cleaning it from plastic.

For each “Reef” produced, in fact, more than 100 plastic bottles, recovered from the sea, are used, contributing concretely to the mission of cleaning the land and the oceans. Sustainability was also given priority in the packaging process, using exclusively recycled cardboard with low environmental impact printing.

In short, with “Reef” you can help save the oceans by sitting comfortably in an armchair.

Every material used, from the upholstery, to the internal frame, to the packaging, has been selected with an environmentally sustainable and circular approach. The padding is composed of recycled polyurethane foam derived from the agglomeration of bulky waste (sofas, mattresses) and from production waste from the furnishing industry and the textile industry. The second material used for the padding is the wadding of thermo-bonded polyester fiber consisting of at least 70% polyester fiber obtained

from the recycling of post-consumer white color polyester containers. The fabric is created entirely from post-consumer recycled plastic, from the plastic debris floating in our seas and from the plastic bottles thrown away and destined for landfill. The green DNA of the Reef armchair continues in the FSC® (FSC-C002023) certified wooden frame: The brand identifies products containing wood from forests managed correctly and responsibly according to strict environmental, social and economic standards.

# A REAL HOME, yours

The Connubia collection in  
the context of real homes... yours!

Here is your home!

It is not home of the architects, designers, polished advertisements, or home from television series.

We are talking about homes where we live every day, rooms often full of objects of everyday life, in which we eat, work, read, in short, we live our daily stories.

We have imagined a new photographic mood, a real experience inside the #Connubity, inserting the furniture of the new Connubia collection in the context of real homes... yours!

The home environment has been left unaltered, we do not want to interfere with it, your personal and authentic objects reflect ourselves, yourself.

Let's go in together.

# Indoor collection finishes 仕上素材

All our materials comply with the strictest quality standards. For your pleasure, we have sourced fabrics which are not only delightfully tactile and stain-resistant, but ones which hold their colour over time. Our ceramic tops are exceptionally hard-wearing, easy to clean and utterly hygienic. Our wood is protected with special varnishing processes which create an effective barrier against staining. In addition, Calligaris S.p.a. is FSC certified, meaning that it only uses wood that comes from well-managed forests in compliance with strict environmental, social and economic standards.

## WOOD TYPES

### SOLID WOOD

Obtained by cutting the tree log through a mechanic process. The aesthetic features and grain pattern depend on the wood essence. Solid wood is usually varnished (finishing process) and reproduces the typical essence shades.

### VENEERS

Veneer is obtained by using thin sheets of wood with different thicknesses which are taken from the best quality tree logs. Veneer layers are usually glued to a support and then stained accordingly. Veneer increases the quality of the products and delivers an excellent aesthetic result.

**P201**  
ウォールナット

### LAMINATED FINISHES

Obtained by pressure gluing various layers of fibrous material soaked in thermosetting resins and spread on the visible layer (plain coloured or patterned) with melamine resins. They are then glued on a wooden grain panel (support). Laminated panels allow a great variety of aesthetic solutions and have excellent stability, resistance to wear and tear, collisions, abrasion and humidity.

### MELAMINE FINISHES – THERMAL STRUCTURED SURFACES

Obtained by gluing plain coloured or patterned sheets which are spread on the visible layer with melamine resins on a wooden grain panel (support). Melamine coated panels allow a great variety of aesthetic solutions, they are durable and have excellent stability and resistance to wear and tear.

## CERAMIC

### LAMINATED CERAMIC-GLASS

The ceramic-glass top is a self-holding product manufactured by coupling one ceramic plate (porcelain tile) to a tempered floating glass thanks to a special process carried out in autoclave. The ceramic plate thickness is 3 mm and is coupled with an 8 mm thick glass (for a total of 11 mm).

The porcelain tile is a ceramic material obtained using a mixture of stoneware composed by clay and valuable raw materials, which are mixed, body tinted, compacted whilst high pressure is applied and finally fired at 1200 °C.

The porcelain tile working surface features exceptional performances in terms of scratch, impact, stain, thermal shock and chemical resistance. It's easy to clean and very hygienic because it does not absorb liquids and does not release harmful substances.

### LAMINATED CERAMIC-WOOD

The ceramic-wood top is obtained by applying a layer of ceramic (gres porcelain tile) onto a panel made of wooden particles with a special gluing technique. The porcelain tile is a ceramic material obtained using a mixture of stoneware composed by clay and valuable raw materials, which are mixed, body tinted, compacted whilst high pressure is applied and finally fired at 1200 °C.

The porcelain tile working surface features exceptional performances in terms of deep abrasion, stain, thermal shock and chemical resistance. It's easy to clean and very hygienic because it does not absorb liquids and does not release harmful substances.

# Outdoor collection finishes 仕上素材

All our materials comply with the strictest quality standards. For your pleasure, we have sourced fabrics which are not only delightfully tactile and stain-resistant, but ones which hold their colour over time. Our ceramic tops are exceptionally hard-wearing, easy to clean and utterly hygienic. Our wood is protected with special varnishing processes which create an effective barrier against staining. In addition, Calligaris S.p.a. is FSC certified, meaning that it only uses wood that comes from well-managed forests in compliance with strict environmental, social and economic standards.

## ECO-STONE

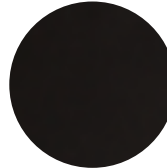

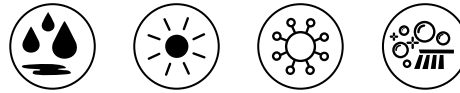

Made of recycled material, obtained from the recovery of fiber-glass and other post-consumption fibre-reinforced composites. They are re-aggregated at high pressure ensuring the product robustness and stability in all environmental conditions. Eco-sustainable and recyclable material at the end of life.

**P1E**  
ソルトペッパー

## MULTILAYER LAMINATE TOPS (HPL)

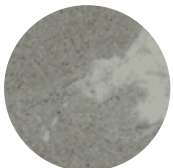

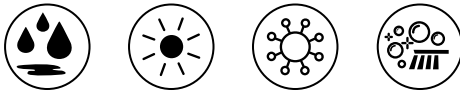

HPL (High Pressure Laminate) is a self-supporting material, with a 10 mm thick black visible edge. It's resistant to abrasion, bumps, scratches and common solvents and to the outdoors. It's antibacterial and, therefore, suitable for contact with food, moreover, it's easy to clean with common household detergents.

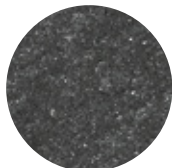

**P9BW**  
ブラック

## CERAMIC

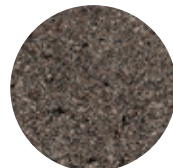

12 mm thick self supporting material made with the IN-SIDE technology. The main feature is the material and aesthetic continuity between edge and surface. It's bump, stain and scratch resistant. Ceramic versatility, ensures that surfaces retain their specifications even when exposed to heat, frost and UV rays. It's a completely natural product, compatible with food substances and does not allow the onset of mold.

## PLASTIC MATERIALS

Polypropylene is a thermoplastic polymer characterized by a good breaking load, a good thermal and abrasion resistance. Its formulation allows it to reduce the negative effects of the combined action of external agents such as water, light, etc. Material suitable for outdoor use.

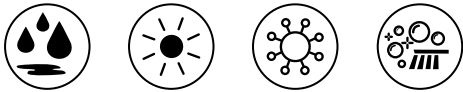

## WASHABLE SYNTHETIC FABRICS

**TORTUGA** | 100% PP | Martindale 40.000 cicli/rubs - EN ISO 12947-2

Braid made of woven polypropylene yarn with internal reinforcement core. Designed for the outdoors it's UV rays and abrasion resistant, does not fear mold and mildew. Most of the dirt and stains can be cleaned if treated promptly. Material suitable for outdoor use.

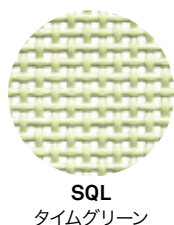

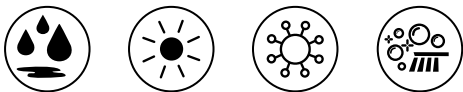

**TRAMA** | 72% PVC - 28% PL gr/m<sup>2</sup> 500 | Martindale 120.000 cicli/rubs - EN ISO 12947-2

This material offers good longevity due to its resistance to climatic conditions. It's made of a PVC-coated polyester fiber that makes it waterproof and easy to clean using non-aggressive detergents. Designed for the outdoors, it's UV ray resistant and does not fear mold and mildew.
